

Curious about the performance and potential of your current improvement management capacity?

What is an Improvement Scan?

The Improvement Scan enables an organization to evaluate the current improvement management capacity and performance and determine the improvement potential

Opportunities and risks are identified and quantified through analyses, interviews, surveys and observations in the workplace

Why an Improvement Scan?

The Improvement Scan is valuable for organizations because it provides concrete recommendations about the optimization of improvement management processes, but also regarding improvement initiatives

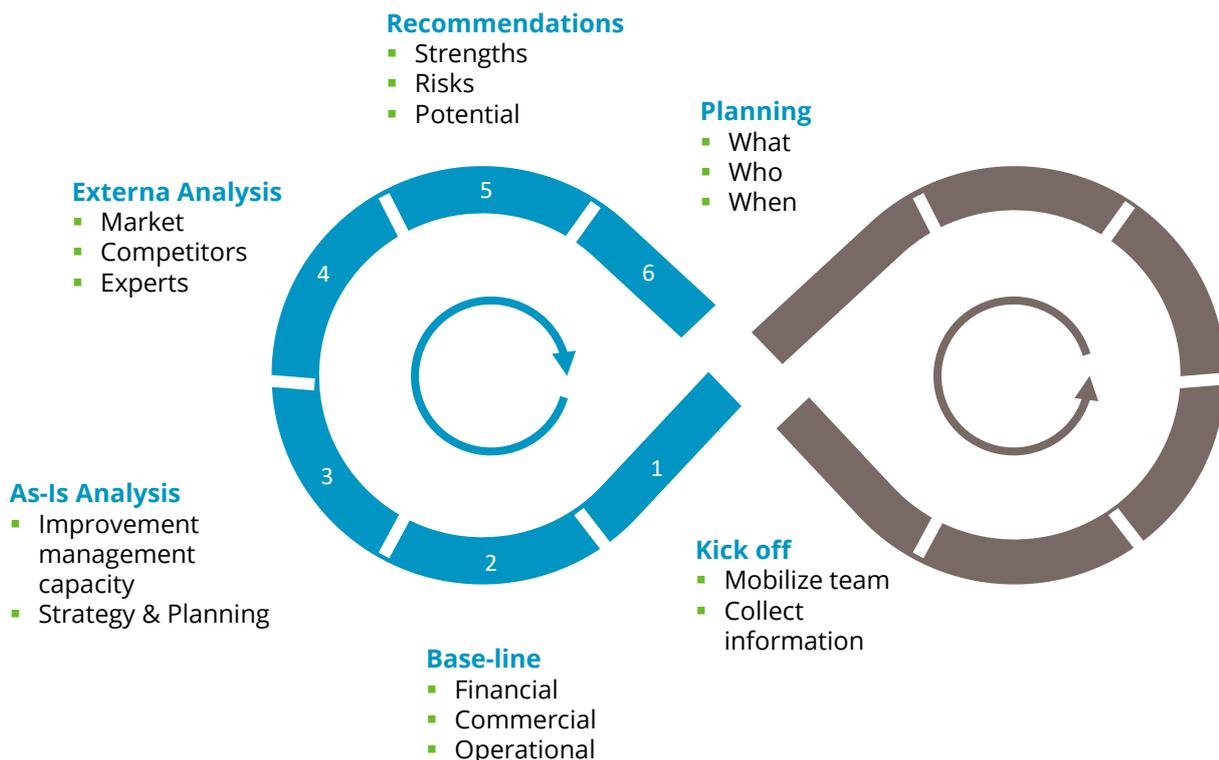

It is an approach that can be implemented in a short time. The methodology provides a complete picture and is practically applicable

What we do?

Improvement Cycle helps you to perform the Improvement Scan. We use a structured approach and deliver various analyzes in a short period of time. The resources to be made available by you will be limited. The insights and recommendations are concrete and feasible

Our approach and results

The steps below are followed during the Improvement Scan. The Improvement Scan is the first phase of the improvement cycle and input for the Improvement Strategy and Roadmap

Who are we?

Improvement Cycle is a network organization consisting of enthusiastic and experienced specialists, experts, trainers and managers

We are passionate about Improvement Management and Organizational Development

Together with organizations we create improvement capacity, optimal culture, innovations and results

In doing so, we apply high standards and values regarding equal rights and rules of contact. Everyone is equal and should be treated with respect

Where do we believe in?

Our services are aimed at accelerating the organization and performance. We do this by evaluating and developing the improvement cycle

By removing barriers, we improve organizational engagement, foster creativity and autonomy

We believe that work can be as natural as leisure if the circumstances are right. Employees will be self-directed and creative to achieve their work and organizational goals if they commit to them

By respecting, guiding, rewarding, and providing people with the means, the individual and organizational goals are both achieved
